

Supporting Planning Statement

Further to correspondence with Katherine Williams and email response from 1st october reference Planning enquiry DM/25/2225 in regards to a new timber structure is proposed.

In addition, I refer to recent correspondence dated 30th October requesting details of the amendments to be considered. Application reference DM/25/2433 and application DM/25/0196.

The applicants would like this amendment to be considered with the current application.

The existing 2No. storage containers have been on site for circa 15 years. The proposal would be to remove these and then replace with one timber structure (4m x 6m and 2.1 metres to the eaves and 2.5 metres to the ridge) which will reduce the amount of visual impact when viewed from the entrance and approach from 5.6m to 4metres.

Proposed timber structure photos to read in conjunction with drawing 294.PL.03 attached. The finish will be to match the other existing structures associated with the glamping pods and honeysuckle hall wedding venue. With a Red Shingle Roof finish.

Hortons timber structure proposed.

Aylesbury 28mm 6.0 x 4.0
