Pine Tree - 69 Western Road Haywards Heath RH16 3LR

Dear Irene

So sorry to email again but just a few **last** points regarding replacement / reduction of my Pine Tree application

1. Safety is 100% more important than visual amenity to the public. Fantastic replacement or reduction will resolve this issue.
2. My pine tree is leaning 10 degrees or more – 2 months ago it was straight - this is a sign of imminent failure.
3. The urgent visit by Michael tree surgeon - (Friendly Tree Services – Crawley) – advised immediately that **the Pine Tree is dying**.
4. I emailed photos to you of the very bad condition of the bark / a few roots uplifting etc. – to prove this point – clearly for your inspection.
5. My pine tree is too close to structures, the road, power lines and the public as advised to you many times.
6. Removing, **beautiful** replacement, reduction - entirely is the only way to eliminate the danger with your support and advice.

I again thank you so much for your time and patience I will totally leave this issue with you now – please accept the application and lets work together - thank you !!!

take great care.

Kind regards

Catherine Holmes
