Re: - Two Daikin air source heat pumps

I need more information on the heat pump

- 1) How much noise will they make.
- 2) How much vapor does it release.
- 3) What are the measurements.
- 4) Will it have a roof.
- 5) What will it be contained in.
- 6) Will the pumps have planting to make it more pleasing to the eye.

Worried about noise at night all our window face west. Pumps going on and off all night.

My lounge windows are floor to ceiling with a door to balcony. Sitting in my lounge the pump will be my view.

Not sure why pumps cannot be in the position of the old equipment, which is very much concealed for everyone with greenery planting. Many Thanks
