Subject: DM/25/0912 - consultation response

[REDACTED]
Dear Sir/Madam,

Re: DM/25/0912 - 2 Atkinson Gardens RH15 0XH

Should this application be approved, please can any cutting back of trees be kept to a minimum 'light touch'. Without seeing the problem I'm unsure how they're a danger to children; however when the development was at the planning stage I remember that this belt of trees was assessed and deemed to be an important feature for a number of reasons. One of the illustrative plans showed a tree canopy slightly overhanging the garden of 2 Atkinson Gardens.

In terms of the new build houses, the trees help screen the development (mainly three storey houses) from pre-existing lower dwellings. The developer did not in the end carry out additional planting along the eastern side of the Adur stream, as shown on their indicative plans, making the preservation of a wide tree boundary even more important.

Many thanks,
