Dear Claire Bulmer

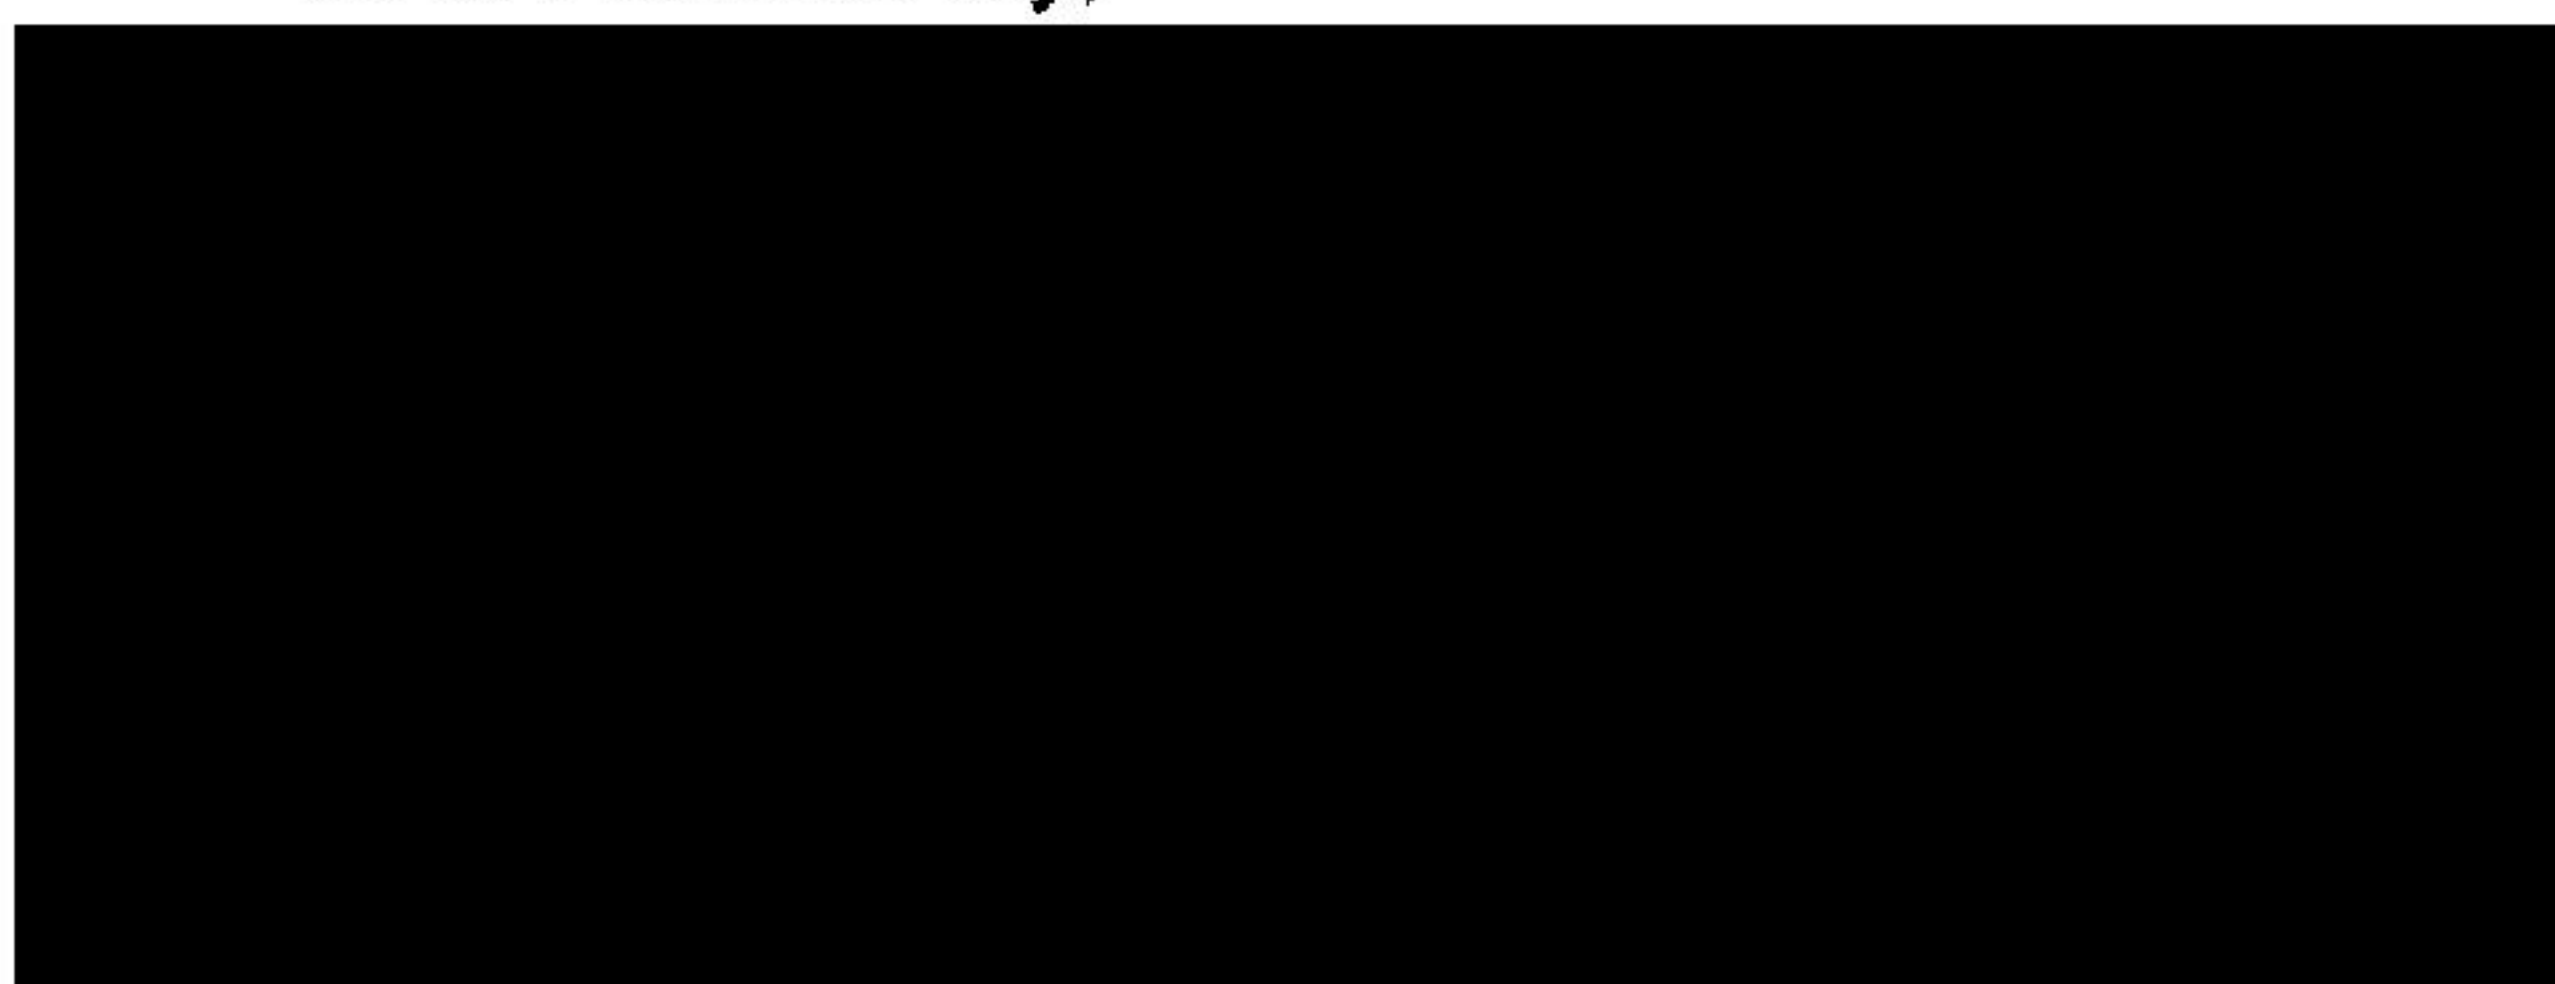

REFERENCE: PLANNING APPLICATION DM/26/0607

Further to our exchange of emails on 31 March, I now enclose the required information in support of the above application, which I trust can be processed reasonably quickly. The company carrying out the work have indicated that they will await the outcome of the application before taking detailed measurements etc but have provisionally scheduled Phase 1 of the work for August.

When we spoke on the 'phone, I explained that the work proposed is refurbishment, and replacement of the sash windows themselves so as to restore the original appearance of the 1907 (single-glazed) units with lightweight double glazed units for both insulation and aesthetic reasons. My wife and I are satisfied that with the work completed the house will regain its appearance of authenticity in keeping with its conservation area environment and has the support of our neighbours in lower Compton Road. I hope the Design and Access Statement makes this clear.

I shall be in touch with your colleagues about payment of the additional £20.

Yours sincerely,

Claire Bulmer
