Comments Details

Commenter Type:	Neighbour or general public
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	The area is served by fibre optic network. There is no need for 5g mast and we certainly don't want it in our back garden buzzing us with radiation. The proposal is to place the mast in a very dense residential area. What impact analysis has been completed? This is also part rural setting with no major businesses or institutions / offices therefore who is benefiting from this installation? If there is a proven necessity, which surely must be proven by studies and

benefit analysis, then 4g is welcome for improved basic level telecom connectivity to the local residents.

Kind regards
