Subject: Discharge of planning conditions at BCA site at Crawley Down Garage ref DM 25/2796

[REDACTED]

Dear Martin I emailed you earlier in the week re the above but apparently I put the wrong ref no.

I live at the end of the lane near to the site and have also been affected by noise from the BCA site, car transporters reversing, unloading and car alarms going off on a regular basis with no one to contact or to be held accountable for me to get in touch with. This was part of the permission granted that a phone number or the like would be provided for residents to contact BCA. This is BREACH OF THE GRANTED PLANNING ALONG WITH THE WORKING HOURS OF THE SITE, WORK BEING UNDERTAKEN ON sUNDAYS AND bANK HOLIDAYS .

Last Friday we had very low voltage coming to our house so we had to call in the Power network. They needed to get into the BCA site to the substation but when they tried it was locked and barred by cars so unable to do so. They gained entry on Monday this week.

I was in my garden on Wednesday and the car alarms were going off all morning, not occasionally but constantly.

Someone was also cutting trees down at the end of the compound which will now make the light pollution and the noise even worse.

Please do not grant this discharge until they can get their act together.

Kind regards
