Dear Sirs

**Town and Country Planning (General Permitted Development) (England) Order 2015,
Schedule 2, Part 15, Class B(e)**

LOCATION: Goddards Green Substation, off Jane Murray Way, Burgess Hill.

**DESCRIPTION: APPLICATION FOR APPROVAL OF EXTERNAL APPEARANCE OF
PROPOSED 33kV SWITCH HOUSE**

On behalf of South Eastern Power Networks plc, I hereby apply to the Council for approval of the design of the external appearance of a proposed 11kV switch house at Goddards Green Substation. The Council's approval is required under the Town and Country Planning (General Permitted Development) (England) Order 2015 Schedule 2, Part 15, Class B(e).

As the proposed switch house will be sited on operational land, and the building contains electrical plant, and it is not more than 15m high, planning permission is not required for the development itself but approval is required for the external appearance.

I have enclosed the following drawings which provide details of the design and external appearance of the proposed building:

9958-UKPN-DR-CO7978-15-0001 Site location & Plan
9958-UKPN-DR-CO7978-15-0006 Building elevations

The facing material to the upper parts of the switch house will be Kingspan KS1000 wall panels in goosewing grey colour RAL 080 70 05. The roof will be Kingspan KS1000 roof panels in the same colour. The lower parts of the switch house will be open but faced with Undercroft (or similar) mesh panels. I look forward to hearing favourably from you but please contact me on 07812 263997 if you require any further information.
