Dear Anna,

we note that the above original planning application has been superceded by a new revised application, and that a new consultative process has been initiated..

The Copthorne & District Angling Society has reviewed this new application and wishes to maintain it's narrative to this application.

Whilst this proposed demolition and re-development is not particularly aesthetically pleasing in this location, the Society does not object to it per se.

However, we must ensure that access to the fishing is protected and preserved. We attach our written submission accordingly. Please confirm receipt.

Yours sincerely

[REDACTED]

Chairman

Copthorne & District Angling Society
