Re Application NoDM/24/3051

Dear Mid Sussex District Council

We object most strongly against the plans to remove and cut back so many of the trees on the raised bank on West Hill this is not in line with current ideas against global warming. We believe that during the first time this gentleman tried for planning many years ago at this same spot a tree preservation order was placed on them to prevent the loss of not only the trees but to prevent an exit road from this property coming out on to West Hill. It was refused then but is being tried again on this same part of the hill which is considerably more busy now as this road is so close to the town centre.

Secondly we live nearly opposite this proposed exit and having lived here over 42 years that the proposed driveway will cause a lot of congestion and will prove a dangerous hazard as this is a very busy road a lot of traffic likes to speed up and down far too fast.

We really feel that this would be a terrible error to allow this plan.
