Hi Stefan

Thanks for the update.

I note that the rooflight wasn't queried before, but I have checked with our clients and they wish to use a rooflight from the rooflight company [The Original Conservation Rooflight & Roof Windows - Rooflight Co.](#) This is a Conservation Rooflight, which will be flush to the roof,

In terms of the weatherboarding, it is proposed to use sawn oak featheredge <https://roundwood.com/product/oak-feather-edge-190-x-28mm/>

I trust that this satisfactorily addresses the Conservation Officer's queries. Happy to agree to the EOT, but I know that our clients are keen to proceed, so would be grateful if there is anything that can be done to speed this up.

Best wishes

Glenda
