Subject: DM/25/1778 Worth School, Paddockhurst Road, Turners Hill, Crawley

Dear Caroline,

I have had a look at the information provided with this application and find that it is insufficient for me to comment.

I can see that there are trees that the survey states will not be needing protection during construction, but it doesn't tell me why not. Another drawing shows a fence being installed within the RPA of a tree, and that a crane will install the generator.

I will need to understand the categorisation of these trees, an Arboricultural Method Statement, and details of why tree protection is not considered necessary. Looking at the information provided, it looks like tree protection is required but without more information it's difficult to say.

Please could you request a Tree Constraints Plan, Arboricultural Impact Assessment and a Tree Survey to BS5837 standards.

Please reconsult me once these documents have been received.

Kind regards

Emma
