1. Identifying the question
 What will cause the distribution of the number of defective components to be 0?

2. Identifying assumptions
 I can only be present until the question has finished. I can't see the question yet.

These are the first ever-published photos of the 1994-95 season.

— 100 —

A close-up photograph of a vertical wooden post, showing its grain and weathered texture. The post is part of a larger structure, likely a fence or railing, and is surrounded by other wooden elements and some foliage in the background.

A close-up photograph of a vertical wooden post, showing its natural grain and texture. The post is light brown and appears to be part of a larger structure.

A close-up photograph of a vertical wooden post. The wood is heavily weathered, showing a mix of brown and grey tones with visible grain and some moss or lichen growth. A metal band or strap is wrapped around the post, visible as a horizontal line. The background is out of focus, showing more of the structure and some greenery.

A close-up photograph of a vertical wooden post, showing its natural grain and texture. The post is light brown and appears to be made of a single piece of wood.
