Notes

1. Survey undertaken generally in accordance with the requirements of the WSCC Survey for Parking 2016
2. Survey covers a radius of 150 metres centred on the BT Green Cabinet on WPC land at the Royal Oak.
3. Survey shows that the maximum demand for parking over the period of observation was 67 vehicles, compared with the available 47 places
4. Peak periods are afterschool collection from school buses, Saturday mornings and some evenings when The Carriage is open and weather good.
5. For the 20 periods monitored, 16 had a demand greater than availability, the average extra demand per period being 16 places.
6. For practical purposes the demand requires a car parking option with a minimum of 20 places.
7. Visual evidence gathered during monitoring showed the Millenium car park being used by several rambling groups who park for up to 6 hours at any time of the week, severely restricting turnover. A typical example of a rambling group visit to the village is shown by Visit 3 on 03 July 2021.
8. This survey has been revisited during Autumn 2023 and it is considered that the data is still relevant with minor upward trends in parking needs. See Below

Autumn 2023 review figures
