Commenter Type:	Neighbour or general public
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	As commented on previously these proposed plans even if slightly revised totally overdevelop the site and have a negative impact on Rocky Lane and therefore should from our perspective should not be permitted As before - PLEASE ensure these points of concern below are fully considered and there is thorough updated analysis before any decisions are taken: There remain a number of significant

concerns regarding this application:

1) the over development of this site - as neighbours we challenged the original building of three blocks of apartments and think any more would be detrimental for the site and aesthetically unsatisfactory from a planning perspective. The views to the South Downs will be impacted further and the new block is squeezed in too close to the railway embankment

2) Car parking - there is not enough additional car parking planned to align with the building of extra flats. Surely more car parking spaces have to be proportionate to the new build. There are often cars/vans parked along old rocky lane associated with the flats. This was previously promised to not be an issue by the developer - but it is daily!

3) Safety - there is already a significant risk on the access road (Old Rocky lane) with the number of cars/pedestrians now using this road, and this will need a full risk assessment based on the current usage - further development adding to the traffic seems totally unacceptable. There have been many near misses (I have been involved in three) and an accident.

4) Building disruption - we have already suffered the mess, noise, lorries etc with the first build from a developer who is not always empathetic to the neighbours to the site. It does not seem right to extend the site further when planning was given for a set amount of development. Surely it's enough as it is.

Kind regards
