Comments Details

Commenter Type: Neighbour or general public

Stance: Customer objects to the Planning Application

Reasons for comment:

Comments: I would like to object to the planning application for the following reasons
Over development of our village - Our village has already been

extensively developed with little thought given to improving the existing infrastructure. It is almost to obtain a GP appointment, the primary school is already over-subscribed and there is one small grocery shop.

These proposed new developments are always awash with promises of funding for local improvements and community projects yet they rarely materialise, leaving the residents of the village to cope with the problems over-development brings. The proposed development will flood the area with another deluge of cars which the road infrastructure will struggle to accommodate. The local roads are already overwhelmed and as for their condition, this will only get worse with the increase of HGV's for the building process and then additional residents cars. The road junction at Felbridge where the A264 meets the A22 has already been surveyed and confirmed to be operating at over capacity with additional local developments putting even more strain on this one junction.

WILDLIFE is already being driven from their local habitats. We now regularly have deer roaming around our village because they have been forced out of their usual location by new developments. This cannot be allowed to keep happening to all species in this area.

I simply cannot see what benefit this proposal will have to my local area and I strongly object to any further developments.

Kind regards
