Comments Details

Commenter Type:	Neighbour or general public
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	The changes made to this application make no difference to my previously expressed objections. In addition, I am not able to find any information about how mobile reception in the area will be affected by any infrastructure already planned as part of the Northern Arc development. Please can this

be requested / published / considered by the planning committee as part of this application. It is entirely possible that there will already be adequate coverage from the combination of existing transmitters (see previous submission re discrepancy between actual coverage and that claimed in the application) and coverage from Northern Arc infrastructure.

Kind regards
