Basis of Report

This document has been prepared by SLR Consulting Limited (SLR) with reasonable skill, care and diligence, and taking account of the timescales and resources devoted to it by agreement with Carter Lauren Construction Limited (the Client) as part or all of the services it has been appointed by the Client to carry out. It is subject to the terms and conditions of that appointment.

SLR shall not be liable for the use of or reliance on any information, advice, recommendations and opinions in this document for any purpose by any person other than the Client. Reliance may be granted to a third party only in the event that SLR and the third party have executed a reliance agreement or collateral warranty.

Information reported herein may be based on the interpretation of public domain data collected by SLR, and/or information supplied by the Client and/or its other advisors and associates. These data have been accepted in good faith as being accurate and valid.

The copyright and intellectual property in all drawings, reports, specifications, bills of quantities, calculations and other information set out in this report remain vested in SLR unless the terms of appointment state otherwise.

This document may contain information of a specialised and/or highly technical nature and the Client is advised to seek clarification on any elements which may be unclear to it.

Information, advice, recommendations and opinions in this document should only be relied upon in the context of the whole document and any documents referenced explicitly herein and should then only be used within the context of the appointment.

1.0 Introduction

This document provides information relating to the proposed hard and soft landscape materials to be used at Francis Court Care Home.

1.1 Landscape Hardworks

The Landscape Hardworks Schedule contains information relating to the proposed materials to be used, along with details of the specification of materials and proposed suppliers.

The information contained within Table A: Landscape Hardworks Schedule should be cross referenced with Drawing 402.065370.00001/003 Landscape Hardworks and the Landscape Specification.

1.2 Landscape Softworks

The Landscape Softworks Schedule contains information relating to all proposed tree and shrub planting and proposed seeding to be carried out as part of the proposed development.

The information contained within Table B: Landscape Softworks Schedule should be cross referred with Drawing 402.065370.00001/002 Landscape Softworks and the Landscape Specification.

2.0 Hard Landscape Materials

Notes: Hard Landscape Materials Schedule to be cross referred to the Landscape Specification and drawing 402.065370.00001/003 Landscape Hardworks.

SITE FURNITURE				
RP	Raised Planters	WoodBlocx (Tel.: 0800 3891420)	Sizes as per site layout on Drawing 402.063432.00001/003 Landscape Hardworks. Planters to be 500mm high. Integrated seating provision in locations as illustrated on Drawing 402.063432.00001/003.	
As shown on drawing 402.063432.00001/003	Timber Seat	Cyan Teak Furniture (Tel.: 0208 6556240)	Balmoral Sturdy Teak Park Bench, 1500mm length. Secured with Hard Ground Anchors.	

Code	Product Name	Supplier (or similar approved)	Description (Size)	Image
As shown on drawing 402.063432.00 001/003	Hardwood Three Bar Timber Walkway Pergola	Dunster House (Tel: 01234 819412)	Size, approx. (L) 2.4m x (W) 2.0m x (H) 2.7m to fit over walkway. Secured with ground anchors. Constructed from smooth sanded teak. Natural finish.	
As shown on drawing 402.063432.00 001/003	Timber Gazebo	Jagram Garden timber Specialists (Tel: +48 797250884)	3m Diameter, 2.95m Height. Green Roof tiles. Secured in place using stainless steel ground anchors.	

Code	Product Name	Supplier (or similar approved)	Description (Size)	Image
As shown on drawing 402.063432.00 001/003	Entrance Signage	Based on Care UK External Signage Schedule	1900mm length brick panel with inscribed welcome plaque set into front of wall and lit with wall washing spotlights. Other site signage locations to be agreed with client.	
SH	Garden Tool Store	Bluum Green Roof Stores Co. (Tel.: 01275 462 647)	Bespoke Tool Store with integrated Green Roof, dimensions 2m (l) x 1m (w) x 1.5m (h) (image indicative, submit proposals from Bluum Green Roof)	
TS	Closed Sided Timber Frame Shelter with Sedum Roof	Bluum Green Roof Stores Co. (Tel.: 01275 462 647)	Bespoke shelter, closed sided, open front, with integrated green roof, 2m (l) x 1m (w) x 2.1m (h) (submit proposals from Bluum Green Roof)	

Code	Product Name	Supplier (or similar approved)	Description (Size)	Image
SS	Sheffield Cycle Stand	Broxap (Tel: 01782 564 411)	Stainless Steel Sheffield Cycle Stand, root fixed, 715mm (w) x 800mm (h), 48.3 – 50mm diameter tube, 316 grade stainless steel	

3.0 Soft Landscape Materials

Notes: Soft Landscape Materials Schedule to be cross referred to the Landscape Specification and drawing 402.065370.00001/002 Landscape Softworks.

Table B: Landscape Softworks Schedule

Botanical Name (Common Name)	Description	Specification	Image
TREES			
Acer campestre 'Streetwise' (Field Maple 'Streetwise')	An upright deciduous form of Field Maple with a tidy oval crown. The lobed leaves emerge light green often with red tips, maturing to dark green then turning bright yellow in autumn. Yellow-green flowers in small loose clusters are produced in April followed by winged fruit called 'keys' which mature from green to red from August-September. Unlike Acer campestre 'Queen Elizabeth', does not suffer from mildew. Grows to a height of 8-10m with a spread to 5-6m.	14-16cm girth; 400-450cm high; rootballed 3x; extra heavy standard; clear stem minimum 200cm; 5 breaks	
Alnus glutinosa (Common Alder)	The Common Alder is a densely branched, medium-sized, occasionally taller tree. Rounded foliage follows the yellow catkins in March. Excellent on moist, even wet sites. Good wind tolerance. Grows to a height of 15-20m with an 8-10m spread.	14-16cm girth; 400-450cm high; rootballed 3x; extra heavy standard; clear stem minimum 200cm; 5 breaks	

Botanical Name (Common Name)	Description	Specification	Image
Betula pendula 'Fastigiata' (Fastigate Silver Birch)	This distinctive Birch is a relatively slow-growing medium-sized tree with a very narrow, upright form which can widen a little in maturity. The leaves are diamond-shaped, toothed and dark green and the bark black and white with the latter predominating. The typical yellow-brown, hanging, male catkins are produced in spring together with the somewhat inconspicuous small red, upright female catkins which elongate and hang downwards providing flat brown windborne seeds. Grows to a height of 10-15m with a 4-6m spread.	14-16cm girth; 400-450cm high; rootballed 3x; extra heavy standard; clear stem 175-200cm; 5 breaks	
Prunus sargentii 'Rancho' (Sargent Cherry 'Rancho')	This form is more upright than Prunus sargentii. Flowers are single pink in clusters in mid-spring immediately followed by glossy reddish-brown spring leaves later turning green. The crowning glory of this fine tree is the autumn foliage with its shades of orange and red in mid-October. Bark is rich dark red-brown; rarely bears fruit which are cherry-red in colour. Grows to a height of 10m with a spread to 4m.	14-16cm girth; 400-450cm high; rootballed 3x; extra heavy standard; clear stem 175-200cm; 5 breaks	
SHRUBS			

Botanical Name (Common Name)	Description	Specification	Image
Cornus sanguinea (Common Dogwood)	Common Dogwood. This native has green stems, flushed red. Green leaves turn an eye-catching reddish-purple in autumn. Black fruits.	40-60cm high; container 3L; branched; 4 breaks	
Hebe 'Mrs Winder' (Shrubby Veronica 'Mrs Winder')	Narrow, green to dark green foliage, finely edged purple on a small to medium sized bush; purple when young. Blue flowers in summer.	40-60cm high; container 5-7.5L; bushy; 7 breaks	
Lavandula angustifolia 'Hidcote' (Lavender 'Hidcote')	Dwarf growing compact form up to 60cm. Silvery grey-green leaves with flower spikes of deep violet-blue from June.	30-40cm high; container 7.5L; bushy; 9 breaks	

Botanical Name (Common Name)	Description	Specification	Image
Lonicera pileate (Privet Honeysuckle)	An evergreen with spreading growth. Mid to dark green shiny foliage is small, but larger than L. nitida types. Good in sun or shade and in most soils. Small cream-white flowers towards the end of April into May followed by violet berries. Can reach 1m high with a 2-2.5m spread.	30-40cm spread; container 5L; bushy; 8 breaks	
Lonicera pileata 'Moss Green' (Privet Honeysuckle 'Moss Green')	Selection with brighter green foliage than the species and not as vigorous.	30-40cm spread; container 5L; bushy; 8 breaks	
Pachysandra terminalis (Japanese Spurge)	Carpeting dwarf evergreen for moist shade. The dark green leaves are set off by green-white flowers in March and April. Classed as a sub-shrub, recognised and used more in-keeping with a shrub than a perennial	20-30cm spread; container 5-7.5L; several shoots; 11 breaks	

Botanical Name (Common Name)	Description	Specification	Image
Rosmarinus officinalis (Rosemary)	This is a fairly vigorous, evergreen, bushy shrub with fine, linear green leaves, white underneath which are strongly aromatic, which can take on a greyish-green appearance particularly in winter. Light purple-blue flowers are produced from April to June and earlier followed by rather inconspicuous though reddish-tinged seed pods. Typically seen in herb gardens for use in culinary dishes. Grows to 1.5m high with a 1.5m spread.	40-60cm high; container 5L; bushy; 5 breaks	
Spiraea japonica 'Firelight' (Japanese Spirea 'Firelight')	A small, rounded, deciduous shrub with oval-pointed toothed leaves which emerge orange-red, turning to bright orange-yellow then pale green and finally to red in autumn. Rosy-pink flowers are produced in July and August. Grows to 50cm high.	30-40cm high; container 5-7.5L; bushy; 7 breaks	
Stephanandra incisa 'Crispa' (Lace Shrub)	Dwarf, mounding deciduous ground cover for sun or shade. Small green crinkled leaves with white flowers in June. A tough plant.	40-60cm spread; container 5-7.5L; branched; 7 breaks	

Botanical Name (Common Name)	Description	Specification	Image
Vinca major 'Variegata' (Variegated Greater Periwinkle)	A vigorous spreading ground covering evergreen with leaves margined with white. Bright blue flowers in April into May followed by a smaller display all summer.	30-40cm spread; container 3L; several shoots; 3 breaks	
Vinca minor (Lesser Periwinkle)	The Lesser Periwinkle is a fairly vigorous, virtually prostrate spreading evergreen groundcover. Numerous bright blue flowers in April to June followed by a smaller display all summer.	30-40cm spread; container 5-7.5L; several shoots; 5 breaks	
Vinca minor 'Gertrude Jekyll' (Lesser Periwinkle 'Gertrude Jekyll')	This Lesser Periwinkle is of compact form, fairly vigorous and a virtually prostrate spreading evergreen groundcover. Numerous white flowers are produced in April into June.	20-30cm spread; container 3L; several shoots; 3 breaks	
HERBACIOUS			

Botanical Name (Common Name)	Description	Specification	Image
Ajuga reptans 'Atropurpurea' (Bronze Bugle)	This variety of the creeping evergreen Bugle has reddish-purple leaves which turn green in shady conditions. Blue upright flower spikes from late April to early June. Thrives in virtually any moist soil in sun or shade. An excellent ground-covering perennial. Attains a height of 15cm with the flowers, with a 45-60cm spread.	container 2L; full pot	
Aster x frikartii 'Wonder of Stafa' (Michaelmas Daisy 'Wonder of Stafa')	Foliage dark green. Light violet-blue with orange-yellow centres produced towards the end of July through to September. Upright plant with a height of 70cm and a spread of 40cm.	container 5L; full pot	
Bergenia cordifolia (Elephant's Ears)	Ground-covering herbaceous evergreen with thick fleshy creeping rhizomes. Large, rounded, glossy green leathery leaves, which can turn purple or purple-tinged in winter. Deep pink flowers produced in small clusters on short reddish stalks rising just above the foliage in March to April. Grows to a height of 40cm with the flowers.	container 5L; full pot	

Botanical Name (Common Name)	Description	Specification	Image
Campanula lactiflora 'Prichard's Variety' (Milky Bellflower 'Prichard's Variety')	Upright perennial with small, green ovate leaves. Panicles of violet-blue bell-shaped flowers in June-August. Grows to a height of 90-120cm.	container 3L; full pot	
Echinacea purpurea (Purple Coneflower)	The Purple Coneflower is an upright perennial with ovate to ovate-lanceolate toothed, rough, hairy dark green leaves. Daisy-like flowers with purple-pink petals and a bronzy-brown centre appear in July to October. As the flower matures, the petal colours fade and droop back while the centre with its short, stiff bristles changes from starting flat to becoming cone-shaped. Flowers attractive to butterflies. Grows to 80cm high with a spread of 20-30cm. The plant is a source of antiviral agent and immune system stimulant.	container 3L; full pot	
Echinacea purpurea 'Magnus' (Purple Coneflower 'Magnus')	The Purple Coneflower is an upright perennial with ovate to ovate-lanceolate toothed, rough, hairy dark green leaves. Daisy-like flowers with deep purple-pink petals and an orange-brown centre appear in July to October. As the flower matures, the petal colour fades but remain level unlike the species with the centre with its short, stiff bristles changing from being flat to becoming cone-shaped also differing from the species by this being larger. Flowers attractive to butterflies. Grows to 80cm high with a spread of 20-30cm. The plant is a source of antiviral agent and immune system stimulant.	container 5L; full pot	

Botanical Name (Common Name)	Description	Specification	Image
Galium odoratum (Sweet Woodruff)	A fast spreading rhizomatous low growing perennial with green leaves arranged in whorls around short green square stems. Very shallow growing horizontal roots quickly form dense mats. Fresh green new growth in early March. Foliage persists throughout a mild winter with lower leaves turning yellow and reddish-brown before withering away. Tiny white lightly fragrant flowers in the latter half of April to early June. Has culinary and traditional uses including pot-pourri giving off the scent of mown hay. Grows to a height of 15cm with an indefinite spread.	container 2L; full pot; September to April planting; British native-origin	
Geranium 'Johnson's Blue' (Cranesbill 'Johnson's Blue')	Green palmate foliage. Light blue flowers from June-July onwards. Grows to a height of 45cm with a 60-70cm spread.	container 5L; full pot	
Geranium macrorrhizum (Balkan Cranesbill)	This ground-covering geranium is a semi-evergreen perennial with a compact, spreading form with light green, aromatic leaves both lobed and toothed. Pink-tinged white-veined pale purple flowers, sometimes magenta or white, are produced in May to July. Grows to a height of 60cm with a 60cm spread.	container 5-7.5L; full pot	

Botanical Name (Common Name)	Description	Specification	Image
Geranium psilostemon (Armenian Cranesbill)	A clump-forming herbaceous perennial with deeply cut palmate green leaves which can take on reddish hues in autumn. Magenta flowers with blackish-purple centres from June to July. Grows to a height of 60-120cm with a 60cm spread.	container 5L; full pot	
Geranium sanguineum (Bloody Cranesbill)	A hardy, bushy, spreading, rhizomatous perennial to 20cm, with palm-shaped, narrowly lobed green leaves. Vivid magenta-pink flowers with darker veining appear from June through to August. A great choice for a rock garden or effective as groundcover	container 3L; full pot	
Heliopsis helianthoides scabra 'Summer Sun' (Ox Eye 'Summer Sun')	An erect, clump-forming herbaceous plant with dark green-bronze leaves and dark red purple stems. Golden yellow flowers with a red-brown centre are produced from summer through until the autumn	container 3L; full pot	

Botanical Name (Common Name)	Description	Specification	Image
Hosta 'Frances Williams' (Plantain Lily 'Frances Williams')	White flowers, with a grey tinged, on 60cm stems in early summer; clump-forming. The foliage of this popular variety has attractive foliage of blue-green with an irregular yellow-green margin	container 5-7.5L; full pot; 3 buds	
Hosta sieboldiana elegans (Plantain Lily elegans)	Large grey-green to blue foliage. Initial pale pink-violet flowers fading to white in summer.	container 5-7.5L; full pot; 3 buds	
Hosta undulata (Waxy leafed Plantain Lily)	This Hosta is typically clump-forming and has narrow, pointed, shiny green leaves with creamy-white centres. Margins are waxy, hence its common name. Pale pinkish-violet flower spikes on green stalks rising above the leaves are produced in June and July. Grows to 45cm high with a 100cm spread.	container 3L; full pot; 2 buds	

Botanical Name (Common Name)	Description	Specification	Image
Kniphofia 'Royal Standard' (Red Hot Poker 'Royal Standard')	A clump-forming semi-evergreen perennial with somewhat untidy strap-like, arching, green leaves. Eye-catching yellow flower spikes, red in bud, are produced on upright green or bronzed-green stalks above the leaves in July-August, which are attractive to bees. Grows to 90cm high with the flowers with a 60cm spread.	container 3L; full pot	
Liatrix spicata 'Kobold' (Gayfeather 'Kobold')	A clump-forming herbaceous perennial with linear green leaves arising from a swollen corm-like root structure. Deep Pink-purple flower spikes opening top downwards, being broader than those of the species, are produced on green upright stems in late July and August which are attractive to bees and butterflies as well as good for use as a cut flower. Grows to a height of 60cm with a 35cm spread.	container 3L; full pot	

Botanical Name (Common Name)	Description	Specification	Image
Mentha pulegium (Pennyroyal)	This herb known for its culinary and medicinal properties is a creeping, rhizomatous, herbaceous perennial with light green, rounded, peppermint-scented leaves, which are relatively small. Upright growth on square stems is produced bearing pinkish-violet flowers in July-August and possibly into September. Grows to 5-10cm high with spikes 30-40cm with a spread of 40cm or more.	container 3L; full pot	
Mentha x gracilis 'Variegata' (Ginger Mint)	This culinary herb is a rhizomatous herbaceous perennial with green and bright yellow oval-pointed, toothed, aromatic leaves on square, reddish-purple upright stems. Leaves smelling strongly of mint with a hint of ginger, hence the common name. Pale pinkish-violet flowers are produced in July into August. Grows to 30cm high with an infinite spread.	container 3L; full pot	

Botanical Name (Common Name)	Description	Specification	Image
Monarda didyma (Bergamot)	This culinary herb is a rhizomatous clump-forming herbaceous perennial with green, oval, shallowly toothed, aromatic leaves on upright, square, green stems. Pink or red tubular flowers arranged in dense whorls with red-green bracts beneath are produced by the beginning of July into August followed by brown seed heads. Used for making tea as well as for adding to salads and is attractive to bees. Grows to 90cm high with a 45cm spread.	container 3L; full pot	
Nepeta 'Six Hills Giant' (Catmint 'Six Hills Giant')	'Six Hills Giant' grows up to 60cm high; the grey-green, aromatic foliage is topped by lavender-blue flowers in summer; clump-forming	container 5L; full pot	
Origanum vulgare (Oregano)	This culinary herb is a mound-forming, spreading perennial with very small, oval green, aromatic leaves. Terminal clusters of white to pink fragrant flowers on square, reddish-brown tinged, hairy upright green stems are produced in July through to early September which are attractive to bees. Grows to 50 centimetres high with a 60-90 centimetre spread although well established plants can reach a height of 80cm with a 140cm spread with the flowers.	container 5L; full pot; September to April planting; British native-origin	

Botanical Name (Common Name)	Description	Specification	Image
Papaver orientale 'Allegro' (Oriental Poppy 'Allegro')	This Oriental Poppy is a clump-forming perennial with long, deeply cut, hairy green leaves. Scarlet-orange cup-shaped flowers with black centres and black inner markings are produced in the latter half of May into June on the top of tall, upright green stems covered in white upward pointing bristles. Seed casings are green with a brown top filled with tiny rounded seeds. Typically dies down from mid-July with re-growth from the centre forming a small clump which remains green throughout the winter. Grows to 40cm reaching 90cm with the flowers and with a spread of 90cm.	container 5-7.5L; full pot	
Penstemon 'Apple Blossom' (Beard Tongue 'Apple Blossom')	'Apple Blossom' is a perennial with small narrow foliage; pale pink tubular bell-shaped flowers from July	container 3L; full pot	
Penstemon 'Geoff Hamilton' (Beard Tongue 'Geoff Hamilton')	A semi-evergreen perennial to around 80cm tall with narrow green leaves. Spikes of funnel-shaped, cherry-red to purple flowers with white and red throats are borne from summer into autumn	container 3L; full pot	

Botanical Name (Common Name)	Description	Specification	Image
Phlox paniculata 'David' (Perennial Phlox 'David')	An upright perennial with narrowly elliptic green leaves in opposite pairs arranged alternately on green stems. Pure white fragrant flowers in terminal conical clusters from July to September. Mildew resistant. Grows to a height of 100cm.	container 3L; full pot	
Rudbeckia hirta (Black-eyed Susan)	A biennial or short-lived perennial often grown as an annual, with oval to diamond-shaped basal leaves that are bristly and sometimes toothed. Daisy-like flowerheads are produced on leafy, upright stems from summer to autumn, with prominent dark brown central cones and spreading yellow petals	container 2L; full pot	
Salvia officinalis (Common Sage)	This evergreen sage is really a sub-shrub consisting of grey-green, oval, hairy, aromatic leaves. Purple flower spikes in May. A culinary and medicinal herb. Grows to a height of 60cm high with an 80-100cm spread.	container 3L; full pot	

Botanical Name (Common Name)	Description	Specification	Image
Thymus 'Hartington Silver' (Thyme 'Hartington Silver')	This creeping Thyme forms a dense mat of very small green and cream-white edged, aromatic leaves. Pale pink flowers are produced in June-July which are attractive to butterflies and bees. Drought tolerant. Grows to 10cm high with a 20cm spread.	container 3L; full pot	
Thymus x citriodorus (Lemon Thyme)	This culinary herb is a low-growing, mound-forming, bushy evergreen perennial with very small, green, lemon-scented leaves. Numerous pink flowers are produced in June-July which are attractive to butterflies and bees. Drought tolerant. Grows to 20-30cm high with a 25-30cm spread	container 3L; full pot	
Veronica prostrata (Prostrate Speedwell)	Low carpet-spreading evergreen perennial with narrowly ovate, toothed bright green leaves. Blue flowers raised just above the leaves from May to June. Useful as a trailing plant. Grows to a height of 15cm with a spread of 40-50cm.	container 3L; full pot	
CLIMBERS			

Botanical Name (Common Name)	Description	Specification	Image
Akebia quinata (Chocolate Vine)	A strong growing semi-evergreen climber with twining stems, purple when young. Leaves are mid to dark green composed of four to five oval-shaped leaflets. Scented purple flowers are borne in April with the emergence of the new leaves. Fruit is rarely produced. Can reach a height and spread of 10 metres.	80-100cm high; container 3L; caned; several shoots; 3 breaks	
Clematis alpina 'Frances Ravis' (Alpine Clematis 'Frances Ravis')	Early-flowering alpine clematis with mid-blue cascading flowers in April/May, followed by white/dull white attractive fluffy seed heads.	60-80cm high; container 3L; caned; several shoots; 2 breaks	
Clematis armandii (Armand Clematis)	Vigorous evergreen climber for a sheltered warm wall in a sunny position. Cream-white waxy flowers in April-May.	60-80cm high; container 3L; caned; several shoots; 2 breaks	

Botanical Name (Common Name)	Description	Specification	Image
Jasminum nudiflorum (Winter Jasmine)	This winter flowering Jasmine carries masses of yellow flowers on bare green shoots between November and February. Does well as a wall shrub or can be used as a free growing rambling bush in the open border or on banks.	40-60cm high; container 3L; caned; several shoots; 4 breaks	
INSTANT HEDGING			
Buxus sempervirens (Common Box)	The Common Box is a slow growing evergreen shrub with glossy green leaves, bright green on emergence darkening with age. Used mainly for hedging and topiary. Grows to a height and spread of 5m.	40-50cm high; container 76L; Readyhedge instant hedging; 25cm wide x 100cm long; pre- formed with continuous root- strip, dense, straight-sided, feathered to base, neatly clipped	
Carpinus betulus (Common Hornbeam)	The hornbeam is a shade tolerant, relatively slow growing but ultimately tall tree. The trunk has smooth grey bark which often has prominent ribs. The foliage is ovate and toothed with an uneven surface. When used as a hedge, the brown autumn foliage which rustles in the wind, persists all through the winter. Grows to a height of 15-20m with a 12-15m spread.	140-160cm high; container 76L; Readyhedge instant hedging; 35cm wide x 100cm long; pre- formed with continuous root- strip, dense, straight-sided, feathered to base, neatly clipped	
Marginals/Aquatics			

Botanical Name (Common Name)	Description	Specification	Image
Iris pseudacorus (Yellow Flag Iris)	A strong growing rhizomatous beardless iris ideal for waterside margins with grey-green strap-shaped leaves. Yellow flowers with brown markings appear from the end of May into June. Grows to 80-100cm high	container 0.5L; full pot; September to April planting; British native-origin	
Mentha aquatica (Water Mint)	A rhizomatous herbaceous perennial with oval, hairy green leaves strongly scented of mint on square reddish-purple upright stems. Pale lilac-pink flowers in July-September which are attractive to butterflies and bees. A plant for damp and wet ground, even in shallow water such as along a pond edge. Grows to 90cm high with a spread of 80cm and beyond.	container 0.5L; full pot; September to April planting; British native-origin	

Botanical Name (Common Name)	Description	Specification	Image
Sparganium erectum (Branched Bur-reed)	A strong growing, spreading, deciduous rhizomatous perennial with bright green upright leaves which are linear and flattened with a central crease. Flowers consist of clusters of both male and female white balls on branched spikes in July-August followed by brown prickly fruit. Grows in still or slow flowing water and margins to a height of 100cm with an indefinite spread.	container 0.5L; full pot; September to April planting; British native-origin	
Veronica beccabunga (Brooklime)	A marginal, aquatic perennial with creeping, hollow stems, rooting as they spread, and usually evergreen, rounded, fleshy leaves. Short, upright spikes of small, bright blue flowers are produced from late spring to late summer	container 0.5L; full pot; September to April planting; British native-origin	
Native Species Rich Hedgerow			
Acer campestre (Common Maple)	The native Common or Field Maple is a variable tree of medium height thriving in sun or shade. The head is rounded, broad and informal. The lobed deciduous leaves open tinged-red turning bright yellow in autumn. Yellow-green flowers in small loose clusters are produced in April followed by winged fruit called 'keys' which mature from green to brown, possibly red-tinged, August-September. Grows to a height of 8-12m with a 10-12m spread.	60-80cm high; bare-root 1+1; transplant - seed raised	

Botanical Name (Common Name)	Description	Specification	Image
Carpinus betulus (Common Hornbeam)	The hornbeam is a shade tolerant, relatively slow growing but ultimately tall tree. The trunk has smooth grey bark which often has prominent ribs. The foliage is ovate and toothed with an uneven surface. When used as a hedge, the brown autumn foliage which rustles in the wind, persists all through the winter. Grows to a height of 15-20m with a 12-15m spread.	60-80cm high; bare-root 1+1; transplant - seed raised	
Corylus avellana (Common Hazel)	The Common Hazel is a native large multi-stemmed shrub or small to medium-sized tree. The long, pale yellow catkins make a fine display in early spring. The relatively large, rounded, green serrated foliage often turns to yellow shades in autumn, when the clusters of edible nuts are ripe. Thrives in a wide range of soils and in sun/light shade.	60-80cm high; bare-root 1+2; transplant - seed raised; branched; 3 breaks	
Fagus sylvatica (Common Beech)	The Common Beech is tall-growing & broad-spreading with typically smooth grey bark. This fine native tree needs ample space to develop its full character. Foliage is broadly oval, opening a translucent green, ageing through mid-green and turning to gold and russet shades in autumn. The smooth, grey bark is attractive, but can crack if unshaded. When used as a hedge, the brown autumn foliage persists through to spring. Grows to a height of 20-25m with a 12-15m spread.	60-80cm high; bare-root 1+2; transplant - seed raised	

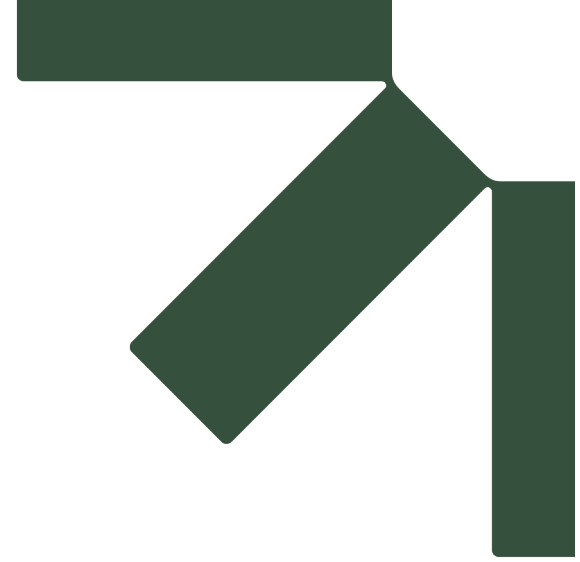

Botanical Name (Common Name)	Description	Specification	Image
Salix caprea (Goat Willow)	The Goat Willow is a small tree or large shrub, though more often the latter. Male yellow catkins and green female catkins (on separate plants) appear in March before the leaves. Fruit in the form of white downy seeds are released in May. Young shoots are a shiny red-brown. Grows to a height of 8m occasionally reaching to 12m, with a spread of 8m.	60-80cm high; bare-root 0/1; cutting; branched; 2 breaks	
NATIVE BOUNDARY MIX			
Acer campestre (Common Maple)	The native Common or Field Maple is a variable tree of medium height thriving in sun or shade. The head is rounded, broad and informal. The lobed deciduous leaves open tinged-red turning bright yellow in autumn. Yellow-green flowers in small loose clusters are produced in April followed by winged fruit called 'keys' which mature from green to brown, possibly red-tinged, August-September. Grows to a height of 8-12m with a 10-12m spread.	60-80cm high; bare-root 1+1; transplant - seed raised	
Cornus sanguinea (Common Dogwood)	Common Dogwood. This native has green stems, flushed red. Green leaves turn an eye-catching reddish-purple in autumn. Black fruits.	60-80cm high; bare-root 1+1; transplant - seed raised; branched; 3 breaks	

Botanical Name (Common Name)	Description	Specification	Image
Crataegus monogyna (Common Hawthorn)	The Common Hawthorn is widely used for hedging. This variable native has small, lobed foliage and brown or grey bark. Masses of clusters of scented white flowers in May and small red fruits in autumn. The best growth is produced in good soil, but the plant is very tolerant of cold, occasional water-logging and wind. Grows to a height of 8-10m with a 6-8m spread.	60-80cm high; container 2L; 1+1; transplant - seed raised; branched; 3 breaks	
Fagus sylvatica (Common Beech)	The Common Beech is tall-growing & broad-spreading with typically smooth grey bark. This fine native tree needs ample space to develop its full character. Foliage is broadly oval, opening a translucent green, ageing through mid-green and turning to gold and russet shades in autumn. The smooth, grey bark is attractive, but can crack if unshaded. When used as a hedge, the brown autumn foliage persists through to spring. Grows to a height of 20-25m with a 12-15m spread.	60-80cm high; bare-root 1+2; transplant - seed raised
