Re: Planning Application DM/25/1968 at 1 Lucas Way, Haywards Heath, RH16 1JR

Dear Sir

Further to my letter of 28 August I would make the following additional observations on the above application which I continue to oppose.

The correspondence from the applicant dated 26th September 2025 clearly sets out that the change of use for the property would be material. They describe comings and goings which would be greater than a typical household which would comprise of a company car, staff cars on overlapping shifts, professional oversight, visits by PCSOs, visits from the missing from home team and visits from the care team which would be of both a “regular” and “monthly” nature. I would draw your attention to APP/G4240/X/23/3327733.

I am conscious that there are many representations that the planning committee needs to consider and will not make this letter over verbose. I would close by saying that on the balance of probabilities it seems highly unlikely that the applicant realised that the property was located in a conservation area.

Yours sincerely
