

SIGNAGE DETAILS

10 Victoria Way, Burgess Hill, RH15 9NF

Project Number: 250010

29th September 2025

Location & Background

The application site is situated on Victoria Way, Burgess Hill, within an established mixed-use area comprising predominantly commercial warehouse and storage units, together with nearby residential dwellings. The residential properties, dating from the 1920s and 1930s, display traditional architectural features and character.

The immediate locality is characterised by a number of commercial properties that have been extended at ground and first floor level. Such alterations are common within this area and form part of the established character.

In conjunction with the replacement of the façade material the proposal seeks to position 2# high resolution digitally printed backlit PVC banner style signs. Each has a finished size of 1650mm(w) x 4350mm(ht). One is to be located centrally above the entrance on the South elevation and the second below the eaves line on the east elevation on the southern edge. These positions are detailed on drawing C14.
