Description of Proposed Works

Please describe the proposals to alter, extend or demolish the listed building(s)

It is intended to create an internal doorway between two bedrooms so one can be used as a dressing room. This requires the removal of one vertical stud in the wall and cutting across a wind-shear bracing beam. There has been a site visit from a structural engineer who has assessed the loading and provided a metal bracing solution to ensure stability which will be the basis of the works. Once completed this will not be visible.

Internally, the door being fitted is consistent with existing doors and fittings.
