

Planning Statement

Site Address

Bishops Place, London Road, Albourne, West Sussex BN6 9BL

Planning Statement

This application is for listed building planning consent for a minor internal change to a Grade II listed building. Such work would be categorised as permitted development under the NPPF and the impact will not be visible externally,

The replacement door will be a bespoke construction to be consistent with existing doors within the room as can be seen in Photograph 1.

To ensure compliance with building standards and building control Ellis Structures have visited site and advised on the reinforcements required to ensure that the works are sound, provide no risk to the building or its residents and that all standards are met. Their design and calculations are all included in the supplementary documents and in consent is granted then they will be implemented by a suitably qualified contractor.
