WHY CHOOSE TIGER?

It's not just the standard of the wood we use that defines a Tiger and marks it out as a high quality building, but the finishing touches and the extra care we take to ensure you can find your perfect space.

SOLID 12MM CLADDING

Tiger buildings are constructed with shiplap cladding, which is superior tongue & groove timber board with a flush-fit finish. Each solid plank is 12mm thick with scalloping to help prevent water ingress. A smooth, solid, strong barrier pre-treated to meet our high quality standards.

Solid 12mm Cladding	Tongue & Groove	Premium TigerFelt®	28 x 44mm Solid Framing	Secure Steel	Toughened Glass	TigerSkin® Treatment	Simple & Easy Assembly	Tiger 20 Year Guarantee

Fantastic service from both Tiger Sheds and Walkers the delivery company, shed received in A1 condition with easy to follow instructions. Putting up the shed was so easy, and it is a great quality shed for a very reasonable price. Looks great.

Product Description	Delivery	Technical Data	Guarantee	Downloads	Eden Reforestation Projects
The TigerFlex® Shiplap Pent Bike Store is perfect for any garden or yard, with a variety of sizes to fit in the space you need. Made in Britain with quality timber and care from our experienced craftsmen, it is a wooden bike store to be proud of, with the flexibility to place the double doors on the side you need, and have the roof sloping front to back or back to front as you require. The high grade 12mm shiplap cladding is supported with extra thick 44x28mm framing for a sturdy, durable building with bags of storage room. This wooden bike store stands on solid floor joists which raise it off the ground to prevent water ingress, and the floor - and the roof - are tongue & groove boarding for extra endurance. Up on top, the high specification TigerFelt® heavy duty mineral felt further protects your bikes and other equipment from the elements. Great for bicycles, lawnmowers, garden furniture - you name it! BEWARE OF IMITATIONS: No fakes, copies or substitutes can get close to the quality and craftsmanship of the real thing. The individual design and quality finish make the TigerFlex® Shiplap Pent Bike Store a great value storage space. Unlike many budget competitor products this shiplap bike shed is built with only the highest quality materials and many garden sheds in the market simply cannot compare! • THIS FLEX PENT BIKE STORE is clad with high grade 12mm finish shiplap tongue and groove cladding – beware of shiplap sheds that feature poorly finished rough edged boards milled out of inferior timber often with a thinner finish. • THIS FLEX PENT BIKE STORE features heavyweight ‘rounded 4 corner’ 28x44mm finish framework throughout giving it the strength to last – beware of shiplap sheds that use rough sawn ‘matchstick thin’ framework that barely hold the shed together. • THIS FLEX PENT BIKE STORE features thick tongue and grooved floorboard in the floor and roof sections and contains NO cheap sheet materials such as OSB or chipboard – beware of shiplap sheds that use single piece OSB / chipboard roofs that					

- offer little protection in the areas where you need it most.
- **THIS FLEX PENT BIKE STORE** retains our extra high ridge height – beware of shiplap sheds that are incredibly low making it difficult to stand up inside.

It is essential that this TigerFlex® Shiplap Pent Bike Store is assembled strictly in accordance with the instructions supplied on a firm and level base constructed from a suitably durable material. It should also be treated shortly after assembly and then annually thereafter with an appropriate high quality preservative and all glazing units must be sealed, inside and out, with silicone or other water tight sealant.

For more information on how to correctly assemble and maintain your wooden bike shed please consult our comprehensive help centre.

All images and photography used is purely for illustrative purposes only – actual product colours may vary slightly due to the digital photography process and variations in individual user monitor settings.
