### Comments Details

I have no objections to this application. However, during the implementation phase there are some environmental impacts that will need to be controlled. This can be addressed by appropriate conditions.

#### Implementation phase

Comments:	During the implementation phase it will be necessary to control emissions of noise and dust to protect local amenity. I therefore recommend a construction environmental management plan (CEMP) is required by a suitable condition. It would be expected that, amongst other things, within the CEMP there is a commitment to restrict hours of work activities, including demolition, site clearance, construction, deliveries, loading and unloading, to the following: 0800-1800 Monday to Friday
-----------	--

0900-1300 Saturdays

No work on Sundays and Bank Holidays

It would also be expected that there is a prohibition on burning of demolition and other waste on site and that best practice measures are specified to minimise noise and dust from crossing the site boundary and affecting local residents.

Recommended condition:

Prior to the commencement of the development a Construction Environmental Management Plan (CEMP) shall be submitted to and approved in writing by the Local Planning Authority. The Construction Environmental Management Plan shall include amongst other matters details of measures to control noise or vibration affecting nearby residents; artificial illumination; dust control measures; pollution incident control and site contact details in case of complaints. The construction works shall thereafter be carried out at all times in accordance with the approved Construction Environmental Management Plan, unless any variations are otherwise first submitted to and approved in writing by the Local Planning Authority.
