MID SUSSEX DISTRICT COUNCIL

DM/25/1100

**21 Blount Avenue, East Grinstead, West Sussex, RH19 1JJ, , ,
Proposed single storey side extension.
Mr And Mrs Lloyd**

SUMMARY OF REPRESENTATIONS

One letter of representation was received. This letter wished to raise concerns regarding the potential additional parking of vehicles at the end of their drive on Blount Avenue and the safety impact that this would have in terms of restricting their view.

SUMMARY OF CONSULTEES

SOUTHERN WATER

No objection.

TOWN COUNCIL OBSERVATIONS

No comment.

INTRODUCTION

The application seeks planning permission for a single storey side extension.

RELEVANT PLANNING HISTORY

GR/003/74- Extension to present garage. Permission.

GR/287/75- Single storey rear extension to provide enlarged kitchen and lounge. Permission.

05/02089/FUL- Two storey side extension. Permission.

SITE AND SURROUNDINGS

21 Blount Avenue is a two-storey detached property characterised by red brick walls, white upvc windows and a plain tile roof. The property has a driveway with off street parking to the front of the property and benefits from a rear garden. The property has been extended several times.

The application property lies within the built-up area of East Grinstead. Neighbouring properties are located to the west and north-east. The highway is located to the west.

APPLICATION DETAILS

The application seeks to erect a single storey side extension.

The extension would measure some 7.1 metres in width and some 2 metres in depth. This is proposed to be used as a lounge area. This would have a maximum height of some 3.5 metres and a height to the

eaves of some 2.4 metres and would have a hipped roof. The proposed walls and roof materials would match the existing.

LEGAL FRAMEWORK AND LIST OF POLICIES

Planning legislation holds that the determination of a planning application shall be made in accordance with the Development Plan unless material considerations indicate otherwise.

Using this as the starting point the development plan for this part of Mid Sussex consists of the District Plan, Site Allocation Development Plan Document (DPD) and East Grinstead Neighbourhood Plan.

National policy (which is contained in the National Planning Policy Framework and National Planning Policy Guidance) does not form part of the development plan, but is an important material consideration.

Mid Sussex District Plan

The District Plan was adopted at Full Council on 28th March 2018.

Relevant policies:

DP26 - Character and Design

Site Allocations DPD

The SADPD was adopted on 29th June 2022. It allocates sufficient housing and employment land to meet identified needs to 2031.

There are no relevant policies.

Neighbourhood Plan

East Grinstead Neighbourhood Plan made in November 2016.

Relevant policies:

Policy EG3 - Promoting Good Design

Other Material Considerations

Mid Sussex District Plan 2021 - 2039 - Submission Draft (Regulation 19)

The District Council is reviewing and updating the District Plan. Upon adoption, the new District Plan 2021 - 2039 will replace the current District Plan 2014-2031 and its policies will have full weight. In accordance with the NPPF, Local Planning Authorities may give weight to relevant policies of the emerging plan according to the stage of preparation; the extent to which there are unresolved objections to the relevant policies; and the degree of consistency of the relevant policies in the emerging plan to the NPPF. The draft District Plan 2021-2039 (Regulation 19) is currently at Examination and the stage 1 hearings were concluded on the 31st October 2024. There are unresolved objections to some of the Policies in the draft District Plan and as such, only minimal weight can be given to the Plan and this planning application has been assessed against the policies of the adopted District Plan.

Relevant policies:

DPS2 - Sustainable Design and Construction

DPB1 - Character and Design

Mid Sussex Design Guide Supplementary Planning Document (SPD)

The Council has adopted a 'Mid Sussex Design Guide' SPD that aims to help deliver high quality development across the district that responds appropriately to its context and is inclusive and sustainable. The Design Guide was adopted by Council on 4th November 2020 as an SPD for use in the consideration and determination of planning applications. The SPD is a material consideration in the determination of planning applications.

National Planning Policy Framework (NPPF) (December 2024)

ASSESSMENT

It is considered that the main issues that need to be considered in the determination of this application are as follows;

- Character and Design
- Impact on neighbouring properties
- Biodiversity Net Gain

Design and Character

Policy DP26 of the Mid Sussex District Plan states:

'All development and surrounding spaces, including alterations and extensions to existing buildings and replacement dwellings, will be well designed and reflect the distinctive character of the towns and villages while being sensitive to the countryside. All applicants will be required to demonstrate that development:

- is of high quality design and layout and includes appropriate landscaping and greenspace;*
- contributes positively to, and clearly defines, public and private realms and should normally be designed with active building frontages facing streets and public open spaces to animate and provide natural surveillance;*
- creates a sense of place while addressing the character and scale of the surrounding buildings and landscape*
- protects open spaces, trees and gardens that contribute to the character of the area;*
- protects valued townscapes and the separate identity and character of towns and villages;*
- does not cause significant harm to the amenities of existing nearby residents and future occupants of new dwellings, including taking account of the impact on privacy, outlook, daylight and sunlight, and noise, air and light pollution (see Policy DP27);*
- creates a pedestrian-friendly layout that is safe, well connected, legible and accessible;*
- incorporates well integrated parking that does not dominate the street environment, particularly where high density housing is proposed;*
- positively addresses sustainability considerations in the layout and the building design;*
- take the opportunity to encourage community interaction by creating layouts with a strong neighbourhood focus/centre; larger (300+ unit) schemes will also normally be expected to incorporate a mixed use element;*
- optimises the potential of the site to accommodate development.'*

Policy EG3 of the East Grinstead Neighbourhood Plan states:

'Planning permission will normally be granted where development proposals meet the following criteria:

- a) The form of the proposed development is proportionate and in keeping with the scale, height, materials and site coverage of the surrounding area;*
- b) The layout of the proposed development respects the topography and character of the site, protects important landscape features and does not harm adjoining amenity;*
- c) The proposal does not result in the loss of buildings or spaces that would have an unacceptable impact on the character of the area;*
- d) The proposal ensures satisfactory means of access for vehicles and pedestrians and provides adequate parking, cycle storage and refuse facilities on site;*
- e) The design of new buildings and the layout of spaces, including footways, car and cycle parking areas, should be permeable and provide connectivity with neighbouring areas;*
- f) New development must be inclusive and where appropriate make satisfactory provision for the safe and easy access for those with mobility impairment; and*

g) The design of new developments must result in the creation of a safe and secure environment and incorporate adequate security measures and features to deter crime, fear of crime, disorder and anti-social behaviour; and
h) Proposals make provision for green infrastructure and biodiversity enhancement. Due to infrastructure constraints within the town, all new development proposals, which generate a net increase in traffic (excluding householder applications), will be required to contribute towards improving the walking and cycle network related to the development and be of a recognised acceptable standard.'

The Mid Sussex Design Guide SPD also provides advice for extensions to dwellings. Principle DG49 states that:

'Extensions should respond to the design of the original dwelling and applicants will be expected to demonstrate how local character has informed the design proposal. Extensions should also normally be designed to be well-integrated with the existing scale, form and massing allowing the original building to remain the dominant element of the property whether it has one or several additions.'

Principle DG50 of the Mid Sussex Design Guide SPD relate to side extensions and states that:

'Side extensions should normally be subservient to the original dwelling and typically be set-back from the front of the house to help define the original building. The gaps between dwellings can sometimes positively contribute to articulating (for example, through the consistent rhythm of repeated houses) and adding interest in a street frontage or by providing views / visible connections to the surrounding countryside. Side extensions will therefore need to appropriately respond to the character of the street form and will not normally be accepted where they close an important gap and view.'

The application relates to an established residential area of East Grinstead, where properties are similar in age and design.

The proposed single storey side extension would be of a modest scale and would be subordinate in height to the existing dwelling. It is considered that the hipped roof design of the extension would coordinate well with the existing property and that the extension would be of a similar character and design to the existing dwelling. The proposed extension would be set-back from the front of the house, which would define the original dwelling. The proposal would not close an important gap or view and is therefore considered to not be harmful to the character of the area. As the proposal includes materials to match the existing, it is considered that the development would provide a consistent finish.

Taking into account the above, the proposal is considered to address the scale and character of the existing and surrounding buildings and townscape. As such the proposal is deemed to comply with the above part of policy DP26 of the District Plan, policy EG3 of the East Grinstead Neighbourhood Plan and principles DG49 and DG50 of the Mid Sussex Design Guide SPD.

Neighbouring Amenities

Policy DP26 in part seeks to ensure that development:

'does not cause significant harm to the amenities of existing nearby residents and future occupants of new dwellings, including taking account of the impact on privacy, outlook, daylight and sunlight, and noise, air and light pollution (see Policy DP29);'

Regarding the neighbour at 19 Blount Avenue, to the north-east of the application site, given the single storey nature of the proposed addition, and the hipped roof design, it is considered that there would not be a significant loss of light or outlook to this neighbour. No windows are proposed on the side (eastern) elevation so it is not considered that this proposal would give rise to any overlooking concerns.

Regarding the neighbour at 23 Blount Avenue, as the extension would be screened by the application property itself, it is not considered that the proposal would be harmful to the amenities of this neighbour.

Due to the domestic nature of the proposed development, it is considered that there would not be a harmful impact in terms of noise, air and light pollution.

It is therefore considered that the proposal would not cause harm to the amenities of neighbouring properties. The proposal is therefore deemed to accord with the above-mentioned part of policy DP26 of the District Plan.

Other matters- parking safety

The concerns raised regarding the parking of contractor's vehicles are noted. However, it is considered that whilst the parking of cars on Blount Avenue as a result of the proposed development may cause a temporary inconvenience during the construction phase, this would not result in significant harm or a highway safety issue that would justify withholding planning permission.

Biodiversity Net Gain

Biodiversity net gain is required under a statutory framework introduced by Schedule 7A of the Town and Country Planning Act 1990. This is a householder application within the meaning of article 2(1) of the Town and Country Planning (Development Management Procedure) (England) Order 2015. As a householder application this development is exempt from the requirement to provide biodiversity net gain.

PLANNING BALANCE AND CONCLUSION

The proposal is considered to be appropriate in terms of design, size and scale to the dwellinghouse and locality, and would not cause significant harm to the amenities of neighbouring properties.

In conclusion, the proposal complies with Mid Sussex District Plan policy DP26, policy EG3 of the Neighbourhood Plan and the relevant provisions of the NPPF. The application is therefore recommended for approval.

Decision: Permission
