Thank you for requesting advice on this application from Place Services' ecological advice service. This service provides advice to planning officers to inform Mid Sussex District Council planning decisions with regard to potential ecological impacts from development. Any additional information, queries or comments on this advice that the applicant or other interested parties may have, must be directed to the Planning Officer who will seek further advice from us where appropriate and necessary.

Application: DM/25/2068
Location: St Johns Lodge 151 High Street Lindfield Haywards Heath
Proposal: Replace later addition rear extension with new single storey extension. Allow for two bay windows and chimney to western elevation including internal alterations. Demolish later addition garage and erect new single bay garage to rear garden with associate landscaping works.

Thank you for consulting Place Services on the above householder application.

No ecological objection	☐
No ecological objection subject to attached conditions	☒

Summary

We have reviewed the Preliminary Ecological Appraisal (Simlaw Ecology, May 2025) and the Full Bat Roost Assessment (Simlaw Ecology, August 2025) relating to the likely impacts of

development on designated sites, protected and Priority species & habitats and identification of appropriate mitigation measures.

We have also reviewed the information submitted relating to mandatory biodiversity net gains.

We are satisfied that there is sufficient ecological information available to support determination of this application.

This provides certainty for the LPA of the likely impacts on designated sites, protected and Priority species & habitats and, with appropriate mitigation measures secured, the development can be made acceptable.

We note that the Full Bat Roost Assessment (Simlaw Ecology, August 2025) confirms the presence of five day-roosts within St Johns Lodge (B1), comprising four common pipistrelle roosts and one brown long-eared bat roost. These are assessed as being of local conservation significance.

However, based on the survey findings and proposed works, we understand that no direct impacts to these roosts are anticipated. As such, an EPS licence will not be required for the development to proceed lawfully. A Non-Licensed Bat Working Method Statement has been provided to safeguard bats during construction, which includes precautionary measures such as timing restrictions, exclusion zones, and supervised soft strip works.

The mitigation measures identified in the Preliminary Ecological Appraisal (Simlaw Ecology, May 2025) and the Full Bat Roost Assessment (Simlaw Ecology, August 2025) should be secured by a condition of any consent and implemented in full. This is necessary to conserve and enhance protected and Priority species particularly those recorded in the locality.

With regard to mandatory biodiversity net gains, it is highlighted that applications are required to deliver a mandatory 10% measurable biodiversity net gain, unless exempt under [paragraph 17 of Schedule 7A of the Town and Country Planning Act 1990](#) and the [Biodiversity Gain Requirements \(Exemptions\) Regulations 2024](#). As a result, we are satisfied that this application is exempt from mandatory biodiversity net gains, as the development meets the householder exemption.

We also support the proposed reasonable biodiversity enhancements for protected, Priority and threatened species, which have been recommended to secure net gains for biodiversity, as outlined under Paragraph 187d and 193d of the National Planning Policy Framework (December 2024). The reasonable biodiversity enhancement measures should be outlined within a separate Biodiversity Enhancement Strategy and should be secured by a condition of any consent.

This will enable LPA to demonstrate its compliance with its statutory duties including its biodiversity duty under s40 NERC Act 2006 (as amended) and delivery of mandatory Biodiversity Net Gain.

Impacts will be minimised such that the proposal is acceptable, subject to the conditions below based on BS42020:2013. We recommend that submission for approval and implementation of the details below should be a condition of any planning consent.

Recommended conditions

1. ACTION REQUIRED IN ACCORDANCE WITH ECOLOGICAL APPRAISAL RECOMMENDATIONS

“All mitigation measures and/or works shall be carried out in accordance with the details contained in the Preliminary Ecological Appraisal (Simlaw Ecology, May 2025) and the Full Bat Roost Assessment (Simlaw Ecology, August 2025) as already submitted with the planning application and agreed in principle with the local planning authority prior to determination.

This will include the appointment of an appropriately competent person e.g. an ecological clerk of works (ECoW) to provide on-site ecological expertise during construction. The appointed person shall undertake all activities, and works shall be carried out, in accordance with the approved details.”

Reason: To conserve protected and Priority species and allow the LPA to discharge its duties under the Conservation of Habitats and Species Regulations 2017 (as amended), the Wildlife & Countryside Act 1981 (as amended) and s40 of the NERC Act 2006 (as amended).

2. PRIOR TO ANY WORKS ABOVE SLAB LEVEL: BIODIVERSITY ENHANCEMENT STRATEGY

“Prior to any works above slab level, a Biodiversity Enhancement Strategy for protected, Priority and threatened species, prepared by a suitably qualified ecologist in line with the recommendations of the Preliminary Ecological Appraisal (Simlaw Ecology, May 2025) and the Full Bat Roost Assessment (Simlaw Ecology, August 2025), shall be submitted to and approved in writing by the local planning authority.

The content of the Biodiversity Enhancement Strategy shall include the following:

- a) Purpose and conservation objectives for the proposed enhancement measures;*
- b) detailed designs or product descriptions to achieve stated objectives;*
- c) locations of proposed enhancement measures by appropriate maps and plans (where relevant);*
- d) persons responsible for implementing the enhancement measures; and*
- e) details of initial aftercare and long-term maintenance (where relevant).*

The works shall be implemented in accordance with the approved details shall be retained in that manner thereafter.”

Reason: To enhance protected, Priority and threatened species and allow the LPA to discharge its duties under paragraph 187d of NPPF 2024 and s40 of the NERC Act 2006 (as amended).

Please do not hesitate to contact us if you have any queries in relation to this advice.
