

SAME OWNER FOR BOTH SITES

SPECIES

- ① LIME
- ② LIME
- ③ LIME

PROPOSAL:

- ① THE LIMBS OVERHANG INTO THE GARDENS AND SHADE THE FIELDS THEY ALSO CAUSE LARGE QUANTITIES OF LEAVES WHICH BLOCK THE GUTTERS + DRAINAGE ON BLOCK 1 & 3. THEREFORE CAUSING DRAINAGE. WE WISH TO BRING IN THE LIMBS CLOSER TO THE TREES BY 2-3 METERS SO WE CAN FORM NEW GROWTH POINTS TO POLLARD THEM IN THE FUTURE.
- ② SAME WITH NO 2 AS NO 1
- ③ WE WILL POLLARD BACK TO KNUCKLES WHERE TREE HAS ALREADY BEEN PRUNED TO IN THE PAST. TAKING ONLY NEW GROWTH OFF

NO TREES TO BE REMOVED ONLY MAINTENANCE WORK
