Subject: Hurst development damage concern

[REDACTED]
Dear Steven

I have been given your name as the person to contact. I live at 6 Greenhill Park which backs onto the field directly affected by the Hurst development planned by Homes England. I understand that planning permission has now been granted.

I wish to register a formal concern regarding the very large oak tree in the garden of 9 Birch Way. This also backs onto the field. It is currently approximately 50 feet high (it has already been pruned several years ago to prevent it becoming taller).

I am extremely concerned and wish to register a formal concern that any building work does NOT cause any damage to the roots.

Due to the prevailing wind direction, if this tree was damaged there is a strong possibility that it would fall directly towards my house. Any damage to the tree and potential housing damage would presumably be the responsibility of the company overseeing the building work?

Please could my concern be noted formally and request that I receive confirmation that this has been noted in the appropriate council documents and passed on to the appropriate company.

I look forward to your reply.

Yours sincerely
