Dear Ms. Biggs,

I have two comments to make regarding the planning application.

Firstly, the installation is an eyesore for a conservation area it should not be allowed. There must be a more professional way of hiding all the wiring.

The other comment is regarding the noise, Although it doesn't directly affect me, I am aware of the stress it causes the owner of the house next door. It isn't fair that he and his partner should have to put up with the continuous hum , which is particularly loud in the summer.

Yours sincerely,
