TPO Details

Further Details	
Are you seeking consent for works to tree(s) subject to TPO	Yes
Are you wishing to carry out works to tree (s) in a conservation area?	No
If you know which TPO protects the tree(s), enter its title or number	
Please identify the tree (s) and provide a full and clear specification of the works you want to carry out	One mature Scots pine (Pinus sylvestris), approximately 18 metres in height with a stem diameter of approximately 870 mm, located in the rear garden of 12 Southdown Close. It is the easternmost of the two Scots pines in the garden, positioned furthest from the house and adjacent to the public footpath along the southern and eastern boundaries. Proposed works: fell the tree completely to as close to ground level as reasonably practicable, in accordance with BS 3998:2010. The work is required because the tree is in poor physiological and structural condition, including poor crown vitality, root-plate movement, areas of dead and loose bark, and a vertical split in a large western limb. The arboricultural report concludes that the tree presents an unacceptable level of risk and recommends that it be felled at the earliest practical opportunity.

Additional Information

ADDITIONALINFORMATION	
For all trees	
Sketch plan clearly showing the position of trees listed in the previous question	12 Southdown Close sketch.jpeg (download)
For works to trees covered by TPO	
Please provide a reason why you wish to perform these works	The work is required because the tree is in poor physiological and structural condition, including poor crown vitality, root-plate movement, areas of dead and loose bark, and a vertical split in a large western limb. The arboricultural report concludes that the tree presents an unacceptable level of risk and recommends that it be felled at the earliest practical opportunity.

Condition of the trees (s)	Yes
