Subject: Objection to planning application DM/25/2418

[REDACTED]
Good afternoon,

We reside at 72 Halsford Park Road and are writing to object to planning application DM/25/2418 on the following grounds:-

Impact to outlook as the planned extension will present a blank wall to windows of our property and will significantly reduce light to our stairwell thus making it possibly unsafe.

From measurement it would appear that the 25 and 45 degree test is not met as the height of the extension ridge line will be above this and impact light to our property in a number of rooms on the north side, especially in the afternoon and evening. As mentioned above this will significantly impact the light to our stair well, kitchen and other rooms.

Should the council still approve this extension we would ask the no windows be allowed in the South upper part of the property either as a change during building or at a later date, as this means that the privacy of our bathroom would be compromised.

Yours sincerely
