Hi.

With reference to the planning application for a mast on land north of No 1 Burdocks Drive. whilst I have no objection in principle, I would ask you to reconsider the actual siting of the mast.

Your suggested positioning would cause a severe amount of unsightliness, being directly in line with our rear view.

May I suggest that you move it to closer to the rear of 1 Burdocks Drive, by placing it further along toward the entrance to Burdocks Drive. As opposed to being in the centre of the two larger trees.

To take it to the opposite side of the entrance to the substation.

Regards
