Subject: Objection to planning application Reference: DM/26/2178

[REDACTED]

I write to submit my formal objection to planning application Reference: DM/26/2178 for 6 houses on College Lane in Hurstpierpoint.

My primary concerns are access to public transport for pedestrians or lack of, increased traffic (busy-ness during school hours, air and noise pollution) on College lane and Wickham hill, road safety and pedestrian safety.

Walking up College lane is a hazard due to no pavements; and turning onto Wickham Hill/Hassocks Road at the top of the lane is hazardous with the speed of traffic approaching from Hurstpierpoint village.

Utilities especially water & aewage are already under considerable strain with the existing network not built for the volume of housing and population Hurstpierpoint & college lane was designed to support.

The village may need some affordable housing, however the proposed more expensive houses will not address those needs. Furthermore, supporting infrastructure (water supply, wastewater, sewerage, schools, health) need to be considered.

Regards,
