Planning application DM/25/2223 relating to the church of Scientology

Dear Sir/Madam,

Re: Objection to Proposed Erection of a Large Marquee by Church of Scientology, Saint Hill, East Grinstead, Sussex

Reference number: DM/25/2223

I am writing to register my concern over the proposed installation of a large marquee by the Church of Scientology located at Saint Hill, East Grinstead.

My main concerns are as follows:

The impact on the local character and surrounding landscape

To install such a large structure would significantly alter the character of the local environment, which is valued for its beautiful landscapes and nature.

.Noise and disturbance

Erecting a marquee of this scale is likely to (and has previously) generated considerable noise, particularly during evenings and weekends. This will have a direct impact on the peace and wellbeing of local residents and wildlife.

.Traffic and parking Issues

Increased visitor numbers to the marquee will inevitably put pressure on local roads causing disruption to those who live nearby.

.The possibility of the marquee staying longer than specified.

A marquee of this scale might remain in place for an extended period, effectively functioning as permanent structure without undergoing the appropriate scrutiny through the full planning process.

My main concerns are that this is out of keeping with the local area and it will negatively impact the residents not to mention the local wildlife. I therefore respectfully request that the council refuse permission for the erection of this marquee.

Thank you for considering my objection.

Yours faithfully,
