11th Sept 2026.

Dear Mrs Williams

I am objecting to the proposed external lighting for the new development in Horsted Keynes.

Horsted Keynes has no existing street lighting and this feature is part of the village's character and one the residents wish to maintain. Lighting on this development would be out of character and a blot on our night landscape.

Any requests for lighting have always been turned down and to grant this would create a precedent for future developments. The parish lies wholly within the High Weald AONB and any lighting would be contrary to the landscape and the habitat of the AONB.

There is no demonstrable reason for this illumination.

Yours faithfully
