Commenter Type:	Business or other organisation
Stance:	Customer made comments in support of the Planning Application
Reasons for comment:	
Comments:	Planning Application Comment - Support Reference: DM/25/2223 I wish to register my support for planning application DM/25/2223. The proposal represents a well-considered improvement to local infrastructure, addressing access, safety, and capacity. The design demonstrates a clear commitment to minimising environmental impact, while also incorporating energy-efficient features that contribute to responsible and sustainable use of the site. These measures help ensure the redevelopment sits sensitively within its surroundings and maintains the character of the area. The scheme will also deliver meaningful community benefits, particularly for local sports teams, families, and young people who rely on safe and reliable access to nearby facilities. Improved parking arrangements will support the large number of children participating in grassroots sport each week, as well as the volunteers who help run these activities. Overall, the application provides a balanced and responsible enhancement to local infrastructure, combining environmental consideration, energy-efficient design, and clear community need. I therefore support DM/25/2223. Alan Chairman EG Meads FC
