Commenter Type:	Neighbour or general public
Stance:	Customer made comments in support of the Planning Application
Reasons for comment:	
Comments:	I am in support of this proposal This will be used for short periods of time throughout the year The proposal preserves and enhances the setting of Saint Hill Manor. The project delivers six times the legal minimum for Biodiversity Net Gain, this is making sure that nature is being recovered. This project will provide local jobs. When there are events being held at the local sports clubs, traffic and parking can be a nightmare, having use of this specially created parking solution will resolve this problem and take the traffic off the streets around. Throughout the celebrations in October, there is so much revenue brought to the local area, support of businesses and support of local charities. As part of the October weekend celebrations, there is a Charity concert and over the last 10 years this has raised over 2,000,000 which has been given to 50 local charities. Without this event, we would never be able to do this for the local charities and communities. I personally look forward to this celebration every year as it brings so much to the town and the area. All the parts of this project have been really thought through to make sure that the least impact is made on the environment and even down to the planting of about 80 new trees. I am in support of this project.

Kind regards
