Subject: FW: DM/25/3228 & DM/25/3229: Wykehurst House, Wykehurst Park, Colwood Lane, Bolney

Good morning Caroline,

I am sending the revised fireplace drawings for the Atrium space, on Vicky's behalf (She has just gone on Mat leave).

We have chosen to make the fireplaces completely different, rather than our previous suggestion of modified versions of the same type. We do hope you and Emily will agree that this approach responds well to Historic England's only lingering concern for this submission.

The proposed surrounds now more closely reference the proportional 'strategies' of the original fireplaces remaining on the ground floor. Here we see some have a more horizontal emphasis and adopt a framed portal design. Others are taller and more elaborate, incorporating features such as columns and taller friezes to emphasise their vertical proportion.

These principles have informed our proposals, but in a more pared-back manner, reflecting the simpler character and scale that would have been typical of second-floor rooms of this period. The scale of each is proposed to mirror the scale of the existing exposed openings.

Kind Regards

Nick Stickland
