Subject: DM/26/1067 - 57 The Broadway, Haywards Heath

Dear Anna,

I have reviewed the Arboricultural Impact Assessment (AIA), Arboricultural Method Statement (AMS), and Tree Protection Plan (TPP), for this proposal.

I note the loss of two hedges and a category B tree. Category B trees are a constraint to development, meaning that there needs to be adequate mitigation if removing valuable trees. I could not find any details of landscaping plans which may provide mitigation planting. Will there be adequate space to provide some mitigation planting?

The trees rest of the trees should be adequately protected by the methods set out in the Arboricultural Method Statement and Tree Protection Plan. Please condition adherence to these documents.

Kind regards

Emma
