Subject: Planning Application DM/26/0454

[REDACTED]

Dear Mr King

As a resident of 1 Marwick Close I would like to object to the above application on the following grounds:

Ansty is virtually a hamlet with only a garage for basic supplies, an almost non existent bus system and an extremely busy road running through it. At the moment, with a small number of houses in our development it can be very tricky exiting our estate. With an additional proposed 33 houses, plus all that would be connected with the development, it is going to cause many problems and possibly accidents trying to join the A272. I also cannot see how the updated footpath is going to help anyone, in fact it would obviously mean the loss of some trees to the roadside which would be a great pity. I also think that Devine Homes should have focused on a separate access for any site traffic as this would be a constant problem for residents of Upton Drive and Marwick Close.

In addition to the above, with the constant power cuts we have been experiencing as well as water problems, the infrastructure simply cannot sustain any further house building in this area.

Surely we should also be thinking of the environment when making these planning decisions? We have so little countryside for us, as well as for the birds and the animals, to live in and enjoy. As mentioned above, we are a small rural community with virtually no facilities. Further building would just add many more cars to what is already a very busy road carrying massive lorries across mid Sussex.

I ask you to consider all these points and refuse Devine Homes application once and for all.

Yours sincerely
