Subject: RE - Application number DM/25/0589.

[REDACTED]
Dear Sirs,

I am writing to object to the construction of the mast and attachments in connection with the above stated application reference.

[REDACTED]

Why we need to be afflicted with facilities for a "smart town", whatever that might be, is beyond me? What is the need if only as another means of fiscal gain from the unwary for the council to feed on? Is this not just another example of AI being used to blight all our lives, especially when times are so hard and people can scarcely afford to live?

I object in the strongest possible terms.

Yours faithfully,

[REDACTED]
