Number	Species	Specification	Pot Size
255	Carex acutiformis	Full Pot	2L
171	Carex riparia	Full Pot	2L
171	Deschampsia cespitosa	Full Pot	2L

OUTLINE SPECIFICATION NOTES:

Existing Trees

- Existing trees to be retained and protected during construction works.

Topsoil/Subsoil in Private Garden Areas

- It has been assumed that there is approximately 150mm of topsoil insitu.
- Imported topsoil to make up shortfall shall be to BS 3882:2015 Multi Purpose.
- Subsoil shall be to BS 8601:2013

Topsoil/Subsoil in Neutral Grassland and Wildflower Meadow

- All existing sward and weeds to be removed to create stale seed-bed ready for sowing in the autumn. In accordance with Weald Meadows Initiative recommendations
- Existing subsoil to be reused with a skim layer of imported topsoil no more than 50mm

Ground Preparation and Planting

- All underground services to be checked and located before commencing planting work.
- Proposed planting beds, hedge trenches and areas for perennial meadow turf shall be weed and grass free, and well cultivated to a depth of 350mm to a fine tilth prior to planting incorporating 25% organic matter/peat free compost.
- All container and bare root plants shall be pit planted, wide enough to accommodate roots when fully spread and 75mm deeper than root system.
- Planting pits to include imported topsoil as required to achieve a depth of 350mm and incorporate a slow-release fertilizer.
- All plants to conform to the National Plant Specification. Container grown plants can be planted out any time if ground conditions are favorable and plants are watered regularly. However, planting shall be avoided between the months of June to the end of August due to high water demands.
- All plant beds and hedge trenches shall be mulched to a depth of 75mm after planting. Mulch shall be graded ornamental bark mulch with an even particle distribution of 5-35mm.
- Native mixed hedges to be double staggered, planted 300mm centres. Transplants to be root dipped prior to planting.
- Hedge plants to be protected by biodegradable spiral guard and supported with bamboo cane.
- All wildflower seed mixes to be from a certified source with local provenance stock and sown at a recommended rate.
- Ground conditions for neutral grassland and wildflower meadow to be prepared, sown and managed in accordance with the supplier or ecologist recommendations.

OUTLINE SPECIFICATION NOTES (cont.):

Tree Planting

- Standard and multi-stem trees to be planted in tree pit 1200mm² by 500mm deep made up of 500mm topsoil with the sides and base of the pit are to be broken up to assist drainage and root penetration.
- Backfill is to include 25% organic matter/peat free compost and a proprietary water retention gel to manufacturers recommendations. An irrigation pipe with cap should also be added around the root ball of each tree.
- Standard trees shall be secured with a peeled larch 50mm diameter double short stake. The stakes should be cut to 900 mm above ground level and the tree secured centrally between the stakes using two independent hessian ties, each fixed from the tree to a stake.
- All tree trunks shall be protected from wildlife damage with biodegradable twin walled shelter of sufficient size to allow extra space for tree growth, secured to a stake to prevent lifting.
- Mulch circle 1000mm diameter and to a depth of 75mm shall be established around the base of the standard and multi-stem trees. Mulch shall be graded ornamental bark mulch with an even particle distribution of 5-35mm.

Watering

- Watering to planted areas is to be undertaken as necessary to ensure plants establishment.
- All trees and shrubs to be watered thoroughly, to full ground capacity, immediately after planting and before the application of mulch.
- Each tree is to receive at least 20L of water every other day fort the first two vegetated seasons, particularly between May to August.
- Within defects period and during times of pronged dry weather watering visits should be factored in.

Maintenance

- Top up mulch annually in spring.
- Replace any dead or diseased plants within the next planting season (Nov-March).
- Ensure planting beds are kept weed free using hand weed control only.
