Subject: Comments - DM/25//0589 - 8th April 2025

[REDACTED]
Hi Planning

The Planning Notice I have seen for this application (by Ann Biggs) gives 10th April as the cut-off date for comments. But your website says the date has passed. Please could you investigate ?

I believe this application should be refused.

The impact on visual amenity of a tower greater than 90 feet in height is not acceptable for a residential area.

Network Rail not installing such infrastructure on their own land is poor from a sustainability point of view.

The associated loss of privacy is also unacceptable in a residential area.

regards,
