Subject: Planning Application No. DM/25/0589

[REDACTED]
To MSDC regarding Planning Application No. DM/25/0589 for a 5G mast to be erected in Burgess Hill by Cellnex;

Please do not give permission for this mast to be erected.

We do not need 5G as there are many problems associated with it.
It is a danger to the health of everyone including wildlife.
It is bad for the environment and uses excessive amounts of power to run and materials to build which we should be conserving, not over using.

Many other countries are against 5G and we should join them and stop the spread.
The area where it is planned is surrounded by an ever increasing number of houses, There are schools there too and children are especially at risk to damage from wireless radiation.

There is an increasing risk to this country from cyber hacking which is no doubt aided by the spread of 5G.

Please listen to your residents and stop this application from going through and do not allow any grounds for appeal.
