Subject: Objection to street lighting in dark skies area

[REDACTED]
Dear Ms Williams,

I am writing regarding the proposed external lighting scheme put forward by Macar Developers for Hamsland development in Horsted Keynes (site SA29) since they were granted planning permission.

I wish to formally object to the introduction of this lighting on the basis that:

1. We are in an AONB and dark skies area which is important for wildlife
2. There is no other street lighting in Horsted Keynes and so this is out of character
3. The original planning permission did not include a street lighting or door illumination scheme something which is in conflict with the Neighborhood plan without strong justification for safety reasons

There is already a lot of tension in the village around the new housing (which is needed!) and things like this with developments granted will just escalate tensions and make achieving housing targets harder.

I would like to lodge this formal objection with MSDC.

Yours sincerely,
