Subject: Horsted Keynes Dark Skies

[REDACTED]

To you all who we trust will see the light !!!

With reference to the St Stephen's field development in the lovely village of Horsted Keynes . Please respect the villagers voice and say NO to the ridiculous idea of lighting the new development so that it becomes even more of an eye sore to this lovely village We have no lighting , and have never needed it in the village and we survive ...even though we have very little water and our cars are all being gently broken by our roads .Think " save the planet " think "green" ... think about the money that could be diverted to repair the potholes that our highways department so easily ignoreand our water supply that we witness flowing down the streets ...

Please , please , please

Thank you xx
