Hi,

The aluminium doors and the roof lantern are fine. W.r.t. the windows I am now concerned that that quote document does show the exact windows they want to order, but these do not match the approved elevational detail- subject to your confirmation, please double check. This does need to be clarified with the architect and if that is the exact windows they are intending it should really be amended to reflect the approval. Basically, I think the product is OK in this context, but they need to make sure the glazing pattern matches the approved drawings. If you think this can be secured by the drawings we have plus an email, that's your call, and I will be happy to go with this, but I do have some concerns based on the history of works on the site not being in accordance with the approval.

I have not had a chance to look at the Section 73 application yet, sorry.

Emily
