Commenter Type:	Neighbour or general public
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	If these properties were to go up I would not have any privacy at all. They would be overlooking my property and looking into my windows. It will also affect the natural light coming in from that direction and I won't have any light coming into my place. The construction of these properties will effect the other properties nearby with the fumes, dust, noise and especially the vibrations from machines which will evidently cause subsidence to mine and other properties that are very close

This also will destroy the environment around the area. With animals and trees living there.
The trees are protected so they won't be able to be cut down.
There are nesting bats in that specific area which I do have video footage off.
Bats are a protected species aswell and they can not be disturbed.

Local people use that ground for picnics, to sit out when it's hot, socialise, take their dogs for walks and also as it's so close to the care home the elderly use it to walk through aswell.

I also suffer from mental illness and this has been a very stressful procedure to look at.
Having no light
No privacy at all
And having to endure this construction is not good for me.

Kind regards
