[REDACTED]
Dear Mr Galyas,

I have received another letter regarding the above application and can see that the applicant has responded to some of the objections. Although the letter is mainly redacted, I can see that he is once again commenting that the occupancy would not be much more than for a standard home. I want to reiterate my point that it isn't just about quantity of occupants, or comings and goings, but about the nature of the comings and goings. I would also like to repeat that this is a very quiet cul de sac, off a very quiet road, in a conservation area. As such, the impact of change is more apparent to those living in the vicinity than it would be in the cases he has given which are from long and busy roads.

Kind regards,

[REDACTED]
