Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	I'm really concerned about the impact this proposed mast / aerial development would have on the local area. For starters, it just doesn't fit in with the look and feel of the estate and it would stick out in a way that feels intrusive and out of place. The design itself doesn't reflect the character of the surrounding buildings or green spaces, with a structure of this size it will feel quite overbearing, especially for people living nearby who would lose much of their

current view. While there may be some benefits being put forward, they don't seem significant enough to justify the wider disruption. There are also real worries about highway safety, especially during construction, and the increased traffic it could bring. On top of that, the loss of mature trees is a big deal it is not just about the visual impact, but also the effect on wildlife and air quality. And finally, the extra noise and disturbance, both during the build and after it's up and running, would seriously affect the peace and quiet people currently enjoy here.

Kind regards
